**Subject:** Microsoft Settlement.

We are at a critical time since September 11, 2001. We must go forward to show the world that we are about building our country up and not tearing it down. I fully agree with President Bush that the DOJ should settle with Microsoft. I understand that some competing company's would find it in their interests to punish Microsoft further than it has been punished, but I truly feel that this is a time for unity, and a time to settle and go forward.  
Thank you, Harold Weisberg
